

A scatter plot showing the distribution of the 'Time' variable. The x-axis is labeled 'Time' and ranges from 2706.6 to 2707.6. The y-axis represents the frequency or count of observations. The data points are concentrated at two distinct time values, approximately 2706.55 and 2707.55, indicating a bimodal distribution. The highest frequency is observed at the second time point, around 2707.55.
