

A scatter plot showing the distribution of the 'Time' variable. The x-axis is labeled 'Time' and ranges from 4905.5 to 4909.5. The y-axis is unlabeled but represents the frequency or count of observations. The data points are clustered into four distinct vertical groups at approximately Time = 4905.5, 4906.5, 4908.5, and 4909.5. The group at Time = 4906.5 is the most dense, while the group at Time = 4909.5 is the least dense. There are also a few isolated points at the lower end of the y-axis for each of these time values.
